

AQUALIN™

TIMBER STAIN WATER BASED • LINSEED OIL

A unique, water based, high performance, linseed oil, penetrating timber stain. Apply as a water based product & when the water evaporates, linseed oil is released to penetrate into the timber forming a low gloss, stain finish of relatively high opacity, giving excellent UV absorption & high durability. Use on absorbent, new or weathered timber surfaces.

Fences & gates • Beams, trellis & pergolas • Houses
New & weathered timber* • Bare & previously stained timber*

TRANSPAR

TRANSPAR is not recommended for exterior finishing unless used for diluting colours when transparency is required - it is not as durable as the colours. It is also useful as a primer for excessively weathered timber prior to using a paint finish.
